Summary

Software Engineer graduate from De La Salle University. Proficient in Java, JavaScript, Python, and C# with hands-on experience developing full-stack systems and Unity-based mobile applications. Experienced in projects involving the specialized integration of technologies such as NLP models and Augmented Reality into interactive mobile applications. Committed to expanding expertise in UI/UX design, advanced system architecture, and automated workflows.

Technical Skills

Languages: Java, JavaScript, C, SQL, Python, C#, HTML, CSS
Frameworks: Express.js, React, Next.js
Database: MongoDB, MySQL
Mobile and Game Development: Kotlin, Android Studio, Unity
Tools: Git, GitHub, Figma, Maven, Gradle
Libraries: Pandas, Matplotlib, Chaquopy

Experience

Programmer June. 2024 - Aug. 2024
DLSU GAME Lab

- Built and delivered 3 AR-enabled Unity scenes using Vuforia and C# in a collaborative development environment.
- Developed Unity scenes using C#, Unity AR tools, and Vuforia for an interactive mobile application designed to demonstrate AR technology.
- Refactored deprecated Unity components to align with updated SDK standards, improving stability during testing.
- Collaborated in an agile team using Git-based version control in order to deliver functional AR prototypes.

Projects

Babaylan Tales (English Educational Game) | *Unity, C#, Python, Java* Aug. 2024 - Aug. 2025

* Integrated a lightweight NLP model via Chaquopy, engineering cross-language communication between Unity (C#) and Python for real-time text processing.
* Designed modular, scalable game systems using OOP principles within a 4-member development team.

PocketTabbies (Location-Based AR Mobile Game) | *Unity, C#, Kotlin, Java* Nov. 2024 - Dec. 2024

* Architected inter-application communication between a native Android application and an integrated Unity AR minigame.
* Implemented location-based gameplay features leveraging Google Maps API to deliver an immersive AR experience.

Database Management System Website – Pearl S. Buck Foundation |
React, NextJs, Javascript, MongoDB Sept. 2023 - Dec. 2023

* Developed a dynamic questionnaire system featuring role-based access control (RBAC) to meet specific client requirements.
* Designed and optimized MongoDB database schemas to ensure high-performance data retrieval and storage.

Analysis of Kickstarter dataset (2009 - 2017) | *Pandas, Jetbeans, Matplotlib* Oct. 2023 - Nov. 2023

* Performed Exploratory Data Analysis (EDA) on a large-scale dataset to identify funding trends and predictive indicators.
* Applied data preprocessing and visualization techniques to extract actionable insights from crowdfunding data.

Education

De La Salle University / College Manila City, Philippines
Computer Science major in Software Technology *2021 - 2026*
